AI & Automation: GenAI Workflows · RAG · UiPath · Claude Code

WORK EXPERIENCE

Data Analyst Intern	Mar 2026 – Jun 2026
Tableau (Salesforce)	Seattle, WA
- Built SQL- and Python-based analyses across 74K+ product feedback records, identifying demand concentration, customer friction, and data-driven insights for leadership decision making - Developed a prioritization framework across 27 product clouds and 280+ categories, translating fragmented product feedback into business case development inputs for roadmap planning - Built a RAG workflow over 12K+ community ideas to automate feedback review, reduce manual synthesis, and accelerate executive reporting on recurring customer needs and product opportunities	

Business Operation Specialist	May 2024 – Aug 2024
JAS Worldwide	Kent, WA
- Built and maintained financial models using Excel, Power BI, macro indicators, account activity, and seasonality, reducing forecast error from 18% to 10% and improving planning visibility - Analyzed revenue performance across 200+ client accounts, identifying 60% revenue concentration in the top five accounts and surfacing pricing, profitability, and account-risk trends - Developed Power BI dashboards to monitor pricing decisions, key metrics, customer follow-up needs, and operational efficiency trends for leadership business reviews	

Investment Banking Associate Intern	Jul 2023 – Sep 2023
China International Capital Corporation	Shanghai, China
- Built EV-sector IPO financial models analyzing revenue drivers, margin assumptions, pricing, operating metrics, and financial concepts to support transaction strategy and business case development - Developed scenario analyses to evaluate how volume growth, margin profile, and cost assumptions affected valuation ranges, profitability outlook, and investor-facing business narratives - Benchmarked EV and advanced manufacturing peers using filings, market data, operating metrics, and profitability trends to support market-based financial analysis and valuation materials	

Business & Operations Data Analyst	Feb 2019 – Aug 2021
Wuxi AppTec Biology	Wuxi, China
- Cleaned and validated business datasets using SQL, Excel, and Python, supporting reporting accuracy across 8+ recurring operational, KPI, and financial analysis processes - Documented data structures, reporting logic, field definitions, and workflow dependencies across 20+ recurring reports, improving communication, consistency, and reporting agility
